“Indoor amusement parks to hotels in Okinawa”

6th Grade, Okinawa AMICUS International School by Hyon Yan

I went to meet my cousin in Korea. One day, it was raining outside. I was bored that day but my aunty said, “let’s go play outside.” I doubted that we could do that because it was raining outside. We went to the destination by a car it took a long time. I felt uneasy while I heard sound of the rain that there is no sign of stopping. When we arrived our destination, it was still raining so I got depressed. However, my cousin came running towards a building very happily. I was surprised at the sight, and I asked my aunty what was going on. Then, she said that the place is an amusement park. When we entered inside of the building, it was bigger than I had expected, and there were some attractions, such as coffee cup rides, merry-go-round, and roller coaster.

Then, I thought that the indoor amusement park in hotel may be good for tourists and the local children in bad weather conditions. Okinawa is frequently hit by a typhoon and the weather sometimes gets bad in summer time rainy-season.

In the amusement park, the activities and attractions should adopt the style of Okinawa, such as Eisa dance show (Okinawan folk dance), making Bingata (Okinawan traditional resist dyed cloth) and Ryukyu glass (Okinawan glass handicraft) as well as attractions such as roller coaster. If there is an indoor amusement park in Okinawa, tourists can experience the culture of Okinawa and many people can enjoy playing at the place even when a typhoon comes or continuing of bad weather outside.

I wish such hotels are built because I want tourists to enjoy staying in Okinawa. Furthermore, I do not want the local children to feel bored.

If such a hotel is built in Okinawa, our daily lives will become very fun, don’t you think? I want all people visiting our Okinawa to make a lot of pleasant memories in Okinawa.
